**Confirmation of the successful performance of an EuCertPlast audit at the plant site of Reiling Kunststoffrecycling GmbH & Co. KG in Marienfeld**

To whom it may concern!

I hereby confirm the successful performance of an audit at Reiling Kunststoffrecycling GmbH & Co. KG according to the EuCertPlast requirements. The audit took place on 2018-11-29 at the site of the recycling plant in Marienfeld.

The audit was conducted without any particular abnormalities. The site has been successfully certified for many years according to the guidelines of LAGA M37. With regard to the EuCertPlast requirements it is an initial certification.

Technically and organisationally, the plant for the recycling of PET waste bottles meets all requirements for the supply with suitable material (i.e. DSD specification 325).

Formally, all necessary documents could be presented, a temporary delivery of suitable material until the submission of the certificate (probably February 2019) can occur.

Kind regards

  
Frank Widmayer
